

WEIGHING HANDBOOK
CHAPTER 3
4/30/2004

CHAPTER 3
Specifications, Tolerances, and Other Technical
Requirements for Testing and Certifying
Official Grain Weighing Devices

TABLE OF CONTENTS

3.1	GENERAL.....	1
a.	Purpose.....	1
b.	Authority	1
c.	Fundamental Considerations.....	1
(1)	General Observations on Accurate Weighing Enforcement	1
(2)	Acceptance or Rejection of Official Weighing Equipment	2
(3)	Request for Approval of New Installation or Modification to an Existing System ..	2
(4)	Security Seals	2
(5)	Prohibited Practices	3
d.	Documentation.....	3
(1)	General	3
(2)	Approved Label for Inspected Machinery (Form FGIS-93l)	3
(3)	Rejected Tag (Form WH-11)	3
(4)	Scale Record Log (Form FGIS-963)	4
(5)	Scale Test Report	4
e.	Scale Testing Frequency	6
(1)	Semiannual Official Tests.....	6
(2)	Development of Historical Data	6
(3)	First Official Test on Existing Weighing Devices	6
(4)	Increased Frequency Testing.....	6
f.	FGIS Type Evaluation Program.....	7
(1)	Purpose.....	8
(2)	Responsibilities.....	8
(3)	Conducting an FGIS Type Evaluation	9
(4)	Other Factors.....	10
	Attachment 1 Scale Test Report -- Grain Hopper.....	11
	Attachment 2 Scale Test Report -- Railroad Track.....	12
	Attachment 3 Scale Test Report -- Vehicle	13
	Attachment 4 Instructions for Completing Scale Test Reports.....	14

3.2	FIELD STANDARDS AND COUNTERPOISE WEIGHTS	15
a.	General	15
b.	Class F Tolerances for Field Standard Weights.....	15
c.	Field Standard Values	15
(1)	Railway Test Cars Under FGIS Jurisdiction.....	15
(2)	Vehicle and Hopper Scales	15
(3)	Numbering Field Standards	15
d.	Care of Standards	17
(1)	Covers	17
(2)	Damage or Abuse.....	17
(3)	Contact with Floors.....	17
e.	Reverification Frequency	17
(1)	Large Field Standards	17
(2)	Basket Weights	17
(3)	On-site Block Weights and Closed Basket Weights Without Casters	18
(4)	Counterpoise Weights, Field Standard Weights up to and Including 50 Pounds, and Sealed Baskets with Casters.....	18
(5)	Portable Block Weights	18
(6)	Railway Track Scale Test Cars	18
(7)	Chains, Hangers, and Baskets	18
(8)	Fabricated Field Standards.....	18
(9)	FGIS-Owned Field Standard Weights and Counterbalance Weights	19
f.	Test Weight Reverification (TWR)	20
(1)	General	20
(2)	TWR Equipment Setup	20
(3)	TWR Procedure - Electronic Mass Comparator	22
(4)	Adjusting Procedure.....	24
(5)	Documentation of Results.....	25
g.	Calibration of Test Car Test Weights	28
(1)	Purpose and Background	28
(2)	Preliminary Setup.....	28
(3)	Procedure (Double Substitution 3-1 Weighing Design)	29
(4)	Calculations.....	30
h.	Railway Track Scale Test Car Calibration.....	31
(1)	Specifications.....	31
(2)	Tolerances	32
(3)	Test Instrumentation	32
(4)	Test Standards.....	32
(5)	Procedure	32
(6)	Documentation	34
i.	Field Calibration of Test Cars or Monitor Cars	34

Attachment 5 Test Car Field Calibration Worksheet.....	40
Attachment 6 TWR Setup.....	41
Attachment 7 Electronic Mass Comparator Linkage Assembly	42
Attachment 8 Electronic Mass Comparator Load Cell Program Values	43
Attachment 9 Cover and Information Sheet	44
Attachment 10 TWR Data and Recalibration Report	45
Attachment 11 TWR Summary Report.....	46
Attachment 12 Three and One Weighing Design	47
Attachment 13 Report of Calibration.....	48
Attachment 14 Report of Test.....	50
 3.3 CLASSIFICATION OF REQUIREMENTS.....	51
a. Applicability.....	51
b. General Requirements.....	51
(1) Identification	51
(2) Official Testing and Certification	52
(3) Facilitation of Fraud.....	52
(4) Permanence	52
(5) Abnormal Performance	52
(6) Use of Adjustments.....	53
(7) Suitability of Equipment	53
(8) Environment.....	53
(9) Interchange or Reversal of Parts	53
(10) Installation.....	53
(11) Installation of Indicating and Recording Elements	54
(12) Method of Operation.....	54
(13) Associated and Nonassociated Equipment	54
(14) Maintenance of Equipment	54
c. Design of Indicating and Recording Elements and of Recorded Representations.....	54
(1) General	54
(2) Weight-Recording Device.....	54
(3) Value of the Indicated and Recorded Scale Division.....	55
(4) Permanence	55
(5) Provisions for Sealing	55
(6) Digital Indication and Representation.....	56
(7) Recording Sequence.....	57
(8) Recorded Weight Identification	57
(9) Change in Mode of Operation.....	57
(10) Capacity Indication, Weight Ranges, and Unit Weights.....	57
(11) Size and Character	58
(12) Values	58
(13) Dual Indications	58
(14) Weight Entries to Recording Devices	58

(15) Size of Graduated Intervals or Increments.....	58
(16) Repeatability of Indications	58
(17) Recorded Representations.....	58
(18) Tape Printers	59
(19) Ticket Printers	59
(20) Multiple Indications and Recorded Representations	59
(21) Marking Operational Controls, Indications, and Features	59
(22) Gate Position.....	59
(23) Interlocks.....	59
(24) Overfill Sensor.....	60
(25) Weighing Sequence.....	60
(26) Zero Indication for Automatic Bulk Weighing and Other Systems.....	60
(27) Zero Indication - Digital Indicating Elements.....	61
(28) Length of Graduations	61
(29) Width of Graduations.....	61
(30) Clear Space Between Graduations	61
(31) Symmetry of Indicators.....	61
(32) Dial Indicator Length	62
(33) Dial Indicator Width	62
(34) Dial Indicator Clearance	62
(35) Parallax	62
(36) Dial Weight Ranges and Unit Weights	62
d. Design of Balance, Tare, and Damping, and Arresting Mechanisms	62
(1) Zero-Load - General.....	62
(2) Zero-Load Adjustment.....	63
e. Design of Weighing Elements	65
(1) Antifriction Means	65
(2) Adjustable Components	65
(3) Multiple Load-Receiving Elements	66
(4) Designation and Parameters for Accuracy Class on Scales Manufactured After January 1, 1986.	66
(5) Multi-Interval and Multiple Range Scales, Division Value.....	66
f. Design of Weighbeams and Poises	66
(1) Normal Balance Position	66
(2) Travel of Pans of Equal-Arm Scale	66
(3) Drainage	67
(4) Travel	67
(5) Subdivision	67
(6) Readability	67
(7) Poise Stop	68
(8) Poises	68
(9) Poise Adjusting Material.....	68
(10) Poise Pawl.....	68
(11) Reading Edge or Indicator	68

g. Marking Requirements.....	68
(1) Capacity and Value of the Scale Division for Automatic Bulk Weighing Scales ...	68
(2) Location Of Marking Information	68
(3) Scales, Main Elements, and Components of Scales or Weighing Systems	69
(4) Railway Track Scales.....	72
(5) Weighing Elements	72
(6) Accuracy Class for Scales Manufactured After January 1, 1986.....	72
(7) Temperature Limits for Scales Marked with an Accuracy Class for Class III and III L Devices.....	72
h. Installation Requirements	72
(1) Protection from Environmental Factors.....	72
(2) Foundation, Supports, and Clearance	72
(3) Access to Weighing Elements.....	73
(4) Approaches to Vehicle Scales.....	73
(5) Hoists	73
i. User Requirements.....	73
(1) Balance Condition.....	73
(2) Scale Modifications	74
(3) Scale Division Selection Requirements for Official Automatic Bulk Weighing Systems	74
(4) Grain Hopper Scales Division Selection Requirement	74
(5) Scale Division Selection Requirements for Scales Marked With An Accuracy Class Other Than Automatic Bulk Weighing Scales.....	75
(6) Scale Division Selection Requirements for Scales Not Marked With an Accuracy Class Other Than Automatic Bulk Weighing Scales	75
(7) Scale Division Selection Requirements for Grain Test Scales According To Application.....	76
(8) Value of Scale Division (d) and Weight Units	77
(9) Split or Double Draft Static Weighing.....	77
(10) Supports	77
(11) Level Condition	78
(12) Railway Track Scales; Alignment of Dead and Weighing rails.....	78
(13) Standing of Equipment and Keeping Scales Under Load	78
(14) Altering Poises and Counterpoise Weights.....	78
(15) Hopper Scale Venting	78
(16) Minimum Test Weight Load for Automatic Bulk Weighing Scales.....	78
(17) Minimum Test Weight Load for Railway Track Scales	78
(18) Minimum Test Weights and Test Loads for Scales Other Than Automatic Bulk Weighing and Railway Track Scales	78
(19) Assistance in Testing	79
(20) Minimum Loading Requirement for an Automatic Bulk Weighing Scale	79
(21) Minimum Load for a Vehicle Scale	79
(22) Maximum Load.....	79
j. Railway Track Scales; Additional Requirement Guidelines.....	80

3.4	TOLERANCES.....	81
a.	General	81
(1)	Theory	81
(2)	Adjustments and Tolerances	81
(3)	Application and Uniformity	81
(4)	Design	81
(5)	Accuracy Classes	81
(6)	Scale Division	82
b.	Tolerance Application.....	82
(1)	General	82
(2)	Multi-Range (Variable Division-Value) Scales	82
c.	Basic and Minimum Tolerance	82
(1)	General	82
(2)	Minimum Tolerance for Scales That are not Under a Class Tolerance Application	82
(3)	Minimum Tolerance for Automatic Bulk Weighing Scales	82
(4)	Tolerances for Scales not Marked with an Accuracy Class, Except for Automatic Bulk Weighing Scales, and Grain Test Scales	82
(5)	Tolerances for Grain Test Scales That are not Marked with an Accuracy Class According to Specific Use	83
(6)	Tolerances for Scales Marked with an Accuracy Class, Except for Automatic Bulk Weighing Scales.....	83
(7)	Tolerances for Automatic Bulk Weighing Scales	84
(8)	Accumulated Error During Increasing Load Tests on Automatic Bulk Weighing Scales	84
(9)	Tolerances for All Vehicle and Railway Track Scales	84
d.	Sensitivity and Discrimination Requirements.....	85
(1)	Sensitivity Requirement (SR) for Nonautomatic-Indicating Scales not Marked with an Accuracy Class	85
(2)	Test Load for Nonautomatic-Indicating Scales Marked With an Accuracy Class. This subsection is applicable to nonautomatic-indicating scales marked II, III, or III L	86
(3)	Test Load for Nonautomatic-Indicating Scales Marked With an Accuracy Class. Minimum Change of Indications for Nonautomatic-Indicating Scales Marked With an Accuracy Class	86
(4)	Discrimination Requirement for Digital Automatic-Indicating Weighing Scales ...	87
(5)	Discrimination Requirement for Analog Automatic-Indicating Scales (i.e., Weighing Device with Dial, Drum, Fan, etc.)	88
(6)	Separate Main Element Requirement for Scales Marked with Accuracy Class: Load Transmitting Element, Indicating Element, etc.....	88
e.	Tolerance Applications	88
(1)	Acceptance Tolerance	88
(2)	Maintenance Tolerance	88
(3)	Repeatability of Test Load Indications	88

(4) Excess and Deficiency	89
(5) Scales That are not Marked With an Accuracy Class Involving Digital Indications or Representations.....	89
(6) Agreement of Indications.....	89
(7) Time Dependence	90
(8) Shift or Section Tests	90
(9) Ratio Tests	90
(10) Railway Track Scales Weighing Uncoupled-in-Motion Cars.....	90
f. Influence Factors.....	90
(1) Applicability.....	90
(2) Temperature	91
(3) Electric Power Supply.....	92
(4) Barometric Pressure	92
(5) RFI Susceptibility Tests, Field Evaluation.....	92
 3.5 TEST PROCEDURES.....	93
a. General.....	93
(1) Scale Installation Requirements.....	93
(2) Error and Tolerance Scale Accuracy Tests	93
(3) "As Found" Testing Requirements.....	93
b. Pretest Examinations.....	93
(1) Purpose.....	93
(2) Pretest Examination Steps	93
c. Radio Frequency Interference (RFI) and Electromagnetic Interference (EMI) Test.....	94
(1) Test Distances	94
(2) Allowed Variation.....	95
d. Associated, Nonassociated Equipment Test	95
(1) Strain Test	95
(2) EMI Test	96
(3) Source Interference Verification	96
(4) Scale Approval.....	96
e. Motion Detection Test	96
(1) General	96
(2) Testing Procedures.....	96
f. Printer Tests	97
(1) General	97
(2) Scales With a Built-in Printer Test	97
(3) Test Procedures for Scales Not Having a Built-in Printer Test	97
g. Sensitivity Tests	97
(1) General	97
(2) Test Load Requirements	98
(3) Test Procedures.....	98
h. Discrimination Test for Electronic Scales	98
(1) General	98

(2) Test Procedure	98
i. Weighbeam Test	99
(1) Fractional Poise Test Using Known Test Weights	99
(2) Fractional Poise Test Utilizing Butt Ratio Weight Kits (Optional).....	100
(3) Ratio Test for Scales with CP Beams (Counter-poise Weighbeams)	100
j. Hopper Scale Buildup Test	101
(1) Corner Test.....	101
(2) Mechanical Hopper Scales Test.....	102
(3) Levertronic or Full Electronic Hopper Scale Test	103
k. Associated Tests for Hopper Scales.....	106
(1) Associated Test for Venting.....	106
(2) The Effects of Hysteresis and Creep Encountered During Testing Of Electronic/Levertronic Scales	107
(3) Time Dependence Requirements for Scales Manufactured After January 1, 1987	107
(4) Determination of Allowable Time for Retention of Grain in a Weigh Hopper, For Scales Installed Prior to January 1, 1987	107
(5) Floating Rig List Test	108
(6) Floating Rig Dynamic Test	109
l. Vehicle Scale Test.....	110
(1) General.....	110
(2) Accuracy Tests	121
m. Track Scale Test.....	130
(1) General.....	130
(2) Section Test.....	130
(3) Strain Test	132
(4) Standard Graduated Test.....	132
(5) Decreasing-Load Test	133
n. Platform Scale Test.....	133
(1) General	133
(2) Tolerances	134
(3) Sensitivity Test.....	134
(4) Shift Test.....	134
(5) Beam-Type Scale Increasing Load Test.....	135
(6) Digital Scale Increasing Load Test	137
(7) Decreasing-Load Test	138
(8) Dial Test.....	138
o. Testing and Calibration Procedure for Master Railway Track Scales	139
(1) Visual Inspection.....	139
(2) Preliminary Setup.....	139
(3) Test Procedure	140
Attachment 15 Master Scale Test Record	144
Attachment 16 Instructions for Completing Master Scale Test Report	145

3.6	DEFINITIONS	147
-----	-------------------	-----
